

## CLAIMS

What is claimed is:

1. An integrated remote control and massage device, comprising:
  - a housing including at least one massage surface;
  - a remote control input interface for enabling a user to control at least one electronic entertainment device; and
  - at least one motor for providing vibrating movement to said massage surface.
2. An integrated remote control and massage device as recited in claim 1, wherein said input interface enables control of one or more of a television, an audio system, a video disc player, a video cassette recorder, a direct broadcast satellite receiver, a personal video recorder, a cable box, digital portable music or portable entertainment systems.
3. An integrated remote control and massage device as recited in claim 1, wherein said input interface enables control of at least one electronic entertainment device by an electromagnetic communication.
4. An integrated remote control and massage device as recited in claim 1, further comprising at least one light source that selectively illuminates said input interface.
5. An integrated remote control and massage device as recited in claim 1, wherein said input interface comprises a touch screen.

6. An integrated remote control and massage device as recited in claim 1, wherein said input interface comprises a touch pad or buttons.

7. An integrated remote control and massage device as recited in claim 1, further comprising a device locator.

8. An integrated remote control and massage device as recited in claim 7, wherein said device locator comprises a receiver and one of a speaker or a flashing light source.

9. An integrated remote control and massage device as recited in claim 1, wherein said housing further comprises a gripable portion including ribs that facilitate gripping of the gripable portion by a user's hand.

10. An integrated remote control and massage device as recited in claim 9, wherein at least a portion of said gripable portion comprises at least one of plastic or thermoplastic elastomer.

11. An integrated remote control and massage device as recited in claim 1, wherein said input interface includes a switch for activating said at least one motor for providing vibrating movement to said massage surface.

12. An integrated remote control and massage device as recited in claim 11, wherein said remote control input interface deactivates control over said electronic entertainment device while said at least one motor is active in order to avoid sending inadvertent commands.

13. An integrated remote control and massage device as recited in claim 1, wherein at least a portion of said massage surface comprises one or more removable massage attachments.

14. An integrated remote control and massage device as recited in claim 1, further comprising at least one heating element that selectively provides heat to said massage surface.

15. An integrated remote control and massage device as recited in claim 14, said heating element comprising at least one infra-red device.

16. An integrated remote control and massage device as recited in claim 1, wherein said housing is sealed so as to prevent or inhibit water or other liquids from entering the device.

17. An integrated remote control and massage device as recited in claim 1, further comprising at least one chamber and electronic interface that allows the device to operate using one or more disposable batteries.

18. An integrated remote control and massage device as recited in claim 1, further comprising at least one rechargeable battery.

19. An integrated remote control and massage device as recited in claim 1, further comprising a flashlight at least partially enclosed within said housing.

20. An integrated remote control and massage device as recited in claim 19, wherein said flashlight comprises one or more LEDs.

21. An integrated remote control and massage device as recited in claim 1, further comprising a sound recorder at least partially enclosed within said housing.

22. An integrated remote control and massage device as recited in claim 21, wherein said sound recorder comprises at least one memory device and at least one activation switch.

23. An integrated remote control and sound recording device, comprising:
- a housing;
  - a remote control input interface, at least partially enclosed within said housing, that enables a user to selectively control at least one electronic entertainment device; and
  - a sound recorder at least partially enclosed within said housing.

24. An integrated remote control and flashlight device, comprising:

a housing;

a remote control input interface, at least partially enclosed within said housing, that enables a user to selectively control at least one electronic entertainment device; and

a flashlight at least partially enclosed within said housing.

25. A massage device that may be selectively attached to a remote control device, comprising:

at least one massage surface;

at least one motor for providing vibrating movement to said massage surface;

means for selectively activating said at least one motor; and

means for selectively attaching said massage device to a remote control device.
